Harman Singh

New Product Development

Mechanical Engineer with a strong 360° product development profile: combines CAD design, simulation, manufacturing engineering and quality management to deliver technically sound, manufacturable solutions.

PROFESSIONAL EXPERIENCE

Rollout Engineer – Field Deployment
Rotork PLC

12/2025 - 02/2026

- **Owned field validation and performance** of mechanical systems, increasing **reliability by 25%** under real operating conditions.
- **Cut repeat failures by 30%** using structured **rootcause analysis (RCA)**.
- Established **field-to-design feedback loops** to support faster issue resolution and continuous improvement.

Quality Manager
Viewpointsystem GmbH

12/2024 - 10/2025

- **Enhanced corrective action effectiveness by 25%** through structured **8D problem-solving** and report creation.
- **Trained employees** in the handling of **ESD-sensitiveelectronic components** to improve process compliance.
- Moderated **DFMEA/PFMEA sessions** during product development to support **risk reduction** and quality awareness.

CAD Designer | Mechanical Design Engineer
Viewpointsystem GmbH

05/2021 - 12/2024

- **Engineered mechanical parts and assemblies** from concept through prototype to **series readiness**.
- **Reduced surface temperatures by 25%** through thermal optimization of **mechanical assemblies**.
- Managed **technical support and release activities** for parts and assemblies, including **drawings, coordination, and designimplementation**.

CERTIFICATES

Artificial Intelligence in Project Management
(03/2026 - 03/2026)

Certificate Leadership Development Curriculum
(09/2022 - 05/2023)

EDUCATION

Master Maschinenbau
Bergische Universität

04/2014 - 10/2015

CORE COMPETENCIES IN PRODUCT DEVELOPMENT

PTC Creo Parametric | SolidWorks | CATIA V5 | Geometric Dimensioning & Tolerancing (GD&T) | Design for manufacturing (DFM/DFA) | LS-DYNA | Altair HyperWorks | LS-OPT | GNS Generator | GNS Animator | Python | Series Production | Product Lifecycle Management (PLM) | PTC Windchill | Quality Control (FMEA, APQP, PPAP) | 7 QC-Tools | Root Cause Analysis (RCA) | 8D-Report | Finite Element Analysis (FEA) – Structural & Thermal | Robust Design | Structural Optimization

LEADERSHIP & AFFILIATIONS

President
Sikh Society Austria

08/2022 - 08/2023

Technical Team Leader
GreenLion Racing Team, BUW, Germany

08/2014 - 08/2015

PROJECTS

BMBF Joint-project eEgO (10/2015 - 06/2018)
Developed model-based optimization tools for automotive crash simulations, improving efficiency in vehicle development processes

GreenLion Racing Team (08/2014 - 08/2015)
Designed lightweight structural components for a Formula Student race car, optimizing performance and structural integrity
